[info@muskokatimbermills.com](mailto:info@muskokatimbermills.com)

A close-up, high-angle photograph of a wooden deck. The deck is made of wide, light-colored wooden planks with a prominent grain. In the upper right, a portion of a chair is visible, featuring a dark, woven seat and wooden legs. In the lower right, a dark mug sits on a circular wooden coaster. The scene is lit with bright, natural light, creating sharp shadows on the deck.

Your dream deck  
awaits...

# About Millboard decking

## A closer look

Millboard decking uses a unique material, unrivalled across the globe. Take a closer look at the construction and performance of this stunning yet functional decking.

### Tough

The unique Lastane® layer is more resistant to scratches and stains and is designed to better withstand demanding outdoor environments.

### Enduring

The dual-tone Lastane® surface is hand tinted using pigments designed to improve resistance to sun damage and fading.

### Safer

Millboard decking is wood-free and non-porous which, in comparison to timber, means good resistance to algae growth and excellent slip resistant properties.

### Beautiful

Each length is hand moulded using specially selected timber masters for an unrivalled organic wood-grain appearance in a composite material.

### Durable

Millboard will not split, rot or harbour insects like timber does.

### Stronger

The structural core is a blend of natural minerals bonded in a polymer resin with renewable biopolymers and fibre reinforcement for added strength and durability.

### Lighter

Our unique closed 'cellular' internal structure reduces weight while maintaining strength.

Millboard decking provides the aesthetic and natural beauty of real wood, without the associated shortcomings. The polyurethane core provides structural durability and strength and eliminates the risk of rotting, warping and core material deterioration.

The resin core is reinforced with fibre for additional strength, stability and reassurance and features renewable biopolymers. The Lastane® surface is pliable and provides high slip-resistance compared to timber, even in wet conditions.

## Crafted to be perfectly imperfect

Each length of Millboard deck is the result of a long process of craftsmanship and attention to visual detail. Just like the specially selected Oak timbers used to create the unique moulds, the fine details and natural imperfections in the original material has to be recreated in the super durable millboard product.

From the initial laying of the Lastane surface, right through to the pouring of the fibre-reinforced resin mineral, we focus on achieving the quality of finish, reflecting the true random and natural characteristics of the original timber. Our mission is to accurately reproduce the original whilst adding all the benefits of our unique board technology, this is why many of our processes are carried out manually. For example, each piece is hand coloured to establish the authentic wood finish our boards are renowned for.

We have great respect for the skilled eye of an artist and are therefore committed to the hand colouring system. The resulting true-to-life shades speak for themselves.

Every step of your decking's journey is characterised by Millboard's artisan methods.

## Why choose Millboard decking?

### More resistant to algae

Unlike wood, there is no protein content to assist algal growth within the boards.

### Slip-resistant

In testing, millboard has a lower slip potential than timber, especially in the wet.

### Mould masters from real oak

Not extruded like most composites. Millboard decking looks just like the real thing.

### Environmentally friendly

Base materials have low impact on global warming and ozone depletion.

### Lightweight

Easier to handle and install.

### Splinter free surface

No wood content means absolutely no splinters on the surface.

### Non-porous

It's non porous surface makes it easier to clean small spills.

### Low maintenance

Does not require regular sanding, staining or oiling, simply clean the boards twice a year.

### Does not warp or rot like wood

No timber content that will rot or be eaten by insects and pests.

### UV and weathering stability

UV stabilised for better performance over time.

### 'Lost head' fixing

Durafix® fixings are virtually hidden beneath the unique Lastane® surface.

### Low carbon footprint

Independently and UKAS accredited to the ISO 14064-1 Verified Carbon Footprint Assurance Mark.

The Collection:

# Enhanced Grain

Exquisitely replicating every detail you'd expect from real wood

## Smooth, sleek texture

Moulded from timbers that are selected from oak boards for a textured look and feel, the Enhanced Grain collection's contemporary design accurately recreates the subtle nuances of natural wood. Each of the shades are slip-resistant and showcase their organic patinas beautifully.

176 x 3600 x 32mm (Approximate sizes)  
1.54 boards per m<sup>2</sup>

## Enhanced Grain

# Antique Oak

Antique Oak's natural, warm hues are similar to the tones of tropical hardwood and the appearance is reminiscent of attractively aged flooring.

Antique Oak boasts more tonal variation per individual board than any of the other colours in the Millboard range, providing a beautiful and organic look.

Board size	176 x 3600 x 32mm
Coverage	1.54 boards per m <sup>2</sup>
Product code	MDE176A

"We opted for Brushed Basalt as it has such a contemporary feel, fostering harmony between our house and the garden. The grain looked so realistic, we couldn't believe it was a replica of timber!"

**Mr and Mrs Hylton** Homeowners

## Enhanced Grain Limed Oak

The look of beautifully sun-drenched timber. Limed Oak has a pale, washed appearance which is the perfect complement to outdoor spaces in sunnier climes.

Limed Oak provides a clean and dreamy aesthetic. Its cool and sophisticated presence allows you to create a refined terrace arrangement, whatever the brief.

Board size	176 x 3600 x 32mm
Coverage	1.54 boards per m <sup>2</sup>
Product code	MDE176L

The Collection:

# Weathered Oak

Create an atmosphere with our timeless, elegant boards

### Time honoured style

Beautifully aged in appearance, our Weathered Oak collection is moulded from over a century old oak boards and is hand-coloured with authentic tones. Providing a timeless look, Weathered Oak retains its natural beauty and offers a surface with minimal maintenance and very high slip-resistance even in wet conditions.

200 x 3600 x 32mm (Approximate sizes)  
1.36 boards per m<sup>2</sup>

## Weathered Oak Vintage

Achieve the classic beauty of a natural, weathered oak finish. Vintage is styled with darker tones that work perfectly in country retreats, coastal getaways and chic city courtyards.

Tastefully aged and utterly timeless, our Vintage colour option adds a stately and refined look to any space.
